DOMINGO TO HAVE A MUSEUM.
Prohibits the Removal from the Republic of Historical Relics.

Washington.—The Republic of Santo Domingo has taken steps for the preservation of articles of archaeological interest by a public decree forbidding the removal hereafter from the republic of any such articles. The decree declares that all such objects are the exclusive property of the government, and while private collections are recognized and respected their removal from the country is forbidden under penalty of the law.

It is declared to be the purpose of the Dominican government to establish a national museum. Hereafter all such antiquities discovered within the boundaries of Santo Domingo will be delivered up to the government to be preserved in the museum. Inducements will be offered to persons holding private collections to present or loan them to the museum.

Many of the archaeological objects referred to belong to the epoch of the discovery of the island by Columbus or to a period immediately following it and have been found underground in caves, caverns or the sites of cities buried by earthquakes.

The decree is issued as a matter of necessity to preserve these historical relics, which are rapidly being carried away to other countries for museums.

Now It's the "Teddy Shuffle."

Des Moines, Ia.—The "Teddy shuffle" is the latest substitute for the "Kangaroo walk." It comes, declared one prominent physician, from society women carrying Teddy bears. They cannot stand up straight with them in their arms, and so they get a sort of walk half way between a shuffle and a leap. Doctors are treating many women for it with poor success.

The only remedy known is to substitute a baby for the Teddy bear, and then it won't altogether cure the habit of shuffling instead of walking. The worst thing about it is that some people think it is fashionable. The "shuffle" hasn't hit the east yet. It started somewhere in the west, possibly where the real live bears are more at home.

Deafness Cannot be Cured.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a running sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; hence cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

CHRISTMAS DINNERS FOR THE DESERVING POOR OF THE CITY

The local Salvation Army has sent out circular letters asking for help from the people of Marion in bringing some little sunshine and cheer into the homes of the poor, and needy in the city. It is indeed a worthy cause and Christmas season surely the one time of the year when such acts of kindness are appreciated by the worthy people who through misfortune are in need of such help. The Mirror gladly publishes the following letter at the request of the Army:

Dear Friend:—Undoubtedly the poor throughout this country look upon the Salvation Army as their friend in their sorrow and poverty. Not that we dispense aid indiscriminately, but rather that our help is prompt and effective and our knowledge of their needs thorough, owing to the fact that our workers live among them.

Many instances could be cited of dire and abject poverty right here in Marion, where wife and children have been robbed of their natural bread winner through accident, sickness and similar causes. Winter is again upon us and we shall be called on to render aid through the distribution of food, coal and clothing.

We are planning to give several hundred Christmas dinners to those who otherwise would go without. For several years I have given this work my personal oversight and shall do so again this winter.

I feel confident that I can fully rely upon your interest and generous assistance, and that you will gladly send your donation to aid such practical philanthropy. Very sincerely yours, GERTRUDE WESTWOOD, Captain.

Shift of Underskirt Fashion.

Time was when gingham underskirts were not good form for street wear, and the petticoats were serviceable but not at all pretty. This year there are fine percales that wash and look like new until they are worn out. They are seen in small black and white shepherd checks, stripes of white and some pretty color, and dashing broken plaids. In French gingham are seen Scotch plaids, and it is almost impossible to tell these gingham from silk. The petticoats are easy to make and require but little time. They are made with a ruffle, which reaches to the knee, while under this ruffle, on the foundation of the skirt, is a little three or four inch dust ruffle.

Real Lace for Millinery.

Imitation laces have been used heretofore almost exclusively by the milliner. But now the milliner is beginning to ask why one should be so fastidious about real laces for gowns and use imitations on the head. This is one of the reasons for the increased prices—this and the vogue for expensive flowers and feathers. Real laces serve their purpose more than once, to be sure, but the styles in them change often, and they are invariably put away for several years every now and then to await a revival. Fortunately it is for the average pocketbook that imitation laces are improving yearly and coming closer to hand-made effects.
